

Sample Deployment Checklist

At home base:

- ☐ Wipe SD Card
- ☐ Check battery voltage and current with multimeter or charger
- ☐ Make sure sensors are showing up on serial monitor: test salinity, turbidity, pressure
- ☐ Test waterproofing in freshwater bucket (w/o electronics!)

At site

- ☐ Plug in battery
- ☐ Seal lid
- ☐ Make sure sensors are showing up on serial monitor: test salinity, turbidity, pressure
- ☐ Place in water so that all three sensors are submerged
- ☐ Record phone GPS location using GPS app
- ☐ Move measurement to multiple target depths and sites
- ☐ Repeat every three hours

Recovery

- ☐ Remove sensors from water – CAREFUL not to disturb pressure port
- ☐ Drain water from frame
- ☐ Towel off excess water
- ☐ Open payload
- ☐ Press user switch to stop logging
- ☐ Remove SD card
- ☐ Quick check of data with verify.m
